DETAILED ACTION

Claim Rejections - 35 USC § 112

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 2, line 1, "said partial side wall members" lack prior antecedent basis in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Gale U.S. Paten 5,806,683.

Gale teaches a package which is structurally similar to the Applicant's claimed blank for a multi-sided container for crustaceans. More specifically, the package includes a base member, one or more thermal conditioning wall members and one or more infiltration barrier wall members. Regarding claim 2, elements 71 and 72 are considered to be means for locking the blank in its folded position. Regarding claim 3, the base member of Gale includes a plurality of thermal and infiltration members. As for claims 4 and 5, the container of Gale is formed from a blank.
